# CAN WE TALK TO WHALES?

*Researchers believe that artificial intelligence may allow us to speak to other species.*

By Elizabeth Kolbert

## Scientists involved:

- CUNY (Gruber, biologist)
- MIT
- Oxford
- Harvard

## Special Pythagorean triplet

### Problem 9

A Pythagorean triplet is a set of three natural numbers,  $a < b < c$ , for which,

$$a^2 + b^2 = c^2$$

For example,  $3^2 + 4^2 = 9 + 16 = 25 = 5^2$ .

There exists exactly one Pythagorean triplet for which  $a + b + c = 1000$ .  
Find the product  $abc$ .

euler #9 answer: 31875000

## Smallest Multiple

### Problem 5

2520 is the smallest number that can be divided by each of the numbers from 1 to 10 without any remainder.

What is the smallest positive number that is evenly divisible by all of the numbers from 1 to 20?

Problem 6: answer 232792560

“brute force”

using loops + computation power
